

Biology 211L (formerly Bio 210)
Fundamentals of Microbiology Laboratory
Section Switchers
Read Carefully

(students enrolled but trying to crash a different section):

If you are currently enrolled in a lab but would like to switch sections, you **MUST** have a valid reason (work or class conflict).

You **MUST** put your name on the **Crash List for Switchers (enrolled crashers)** in the lab section you are trying to switch into. You **MUST** attend and do the lab work in your **enrolled** section, not the one you are trying to crash. You should inform the TA in the section you are enrolled in what your plans are. We will do our best to accommodate you after the crashers are sorted out.

You can choose from one of the following:

Your chances of switching sections are as follows:

1. Find someone in the section you need to switch to that wants to switch into your section. Let both TAs know what you are trying to do. Both students need to see Marlene DeMers, NLS 418E. Each student will have to drop their section and get an add code for the new section at the same time (swapping sections).
2. Sign the Switcher Crash list only. The switchers will get second priority after all the crashers are done.
3. Drop the section you are enrolled in and sign the Crash list for the section(s) you are trying to crash. Then you will be in the Crasher Lottery. See the Crasher instructions.

Note: Incomplete students are not crashers. They should inform the TA, Marlene and the Professor if they have an incomplete and are trying to finish the course. Any questions, please see Marlene DeMers.
