Journals of Interest - Mathematics and Science Education

June/July 2013

TABLE OF CONTENTS

Journal..............................................................................................................................Page

Educational Researcher........................................................................................................2
Volume 42, Issue 5...............................................................................................................2
Educational Studies in Mathematics..................................................................................3
Volume 83, Issue 2..............................................................................................................3
Volume 83, Issue 3..............................................................................................................4
Mathematical Thinking and Learning...............................................................................7
Volume 15, Issue 3..............................................................................................................7
Journal of Research in Science Teaching...........................................................................8
Volume 50, Issue 5..............................................................................................................8
International Journal of Science Education......................................................................9
Volume 35, Issue 9............................................................................................................9
Volume 35, Issue 10......................................................................................................... 9
Volume 35, Issue 11.......................................................................................................10
Volume 35, Issue 12.......................................................................................................11
Science Education...........................................................................................................12
Volume: 97, Issue 4........................................................................................................12
International Journal of Mathematical Education in Science and Technology.............14
Volume 44, Issue 4...........................................................................................................14
Volume 44, Issue 5...........................................................................................................15
The Journal of Mathematical Behavior.............................................................................16
Volume 32, Issues 2.........................................................................................................16
Research in Mathematics Education...............................................................................18
Volume 15, Issue 2.........................................................................................................18
Journal for Research in Mathematics Education..........................................................21
Volume 42, Issue 4.........................................................................................................21
Science..........................................................................................................................22
Volume 340....................................................................................................................22
Volume 341....................................................................................................................23
Educational Researcher

Volume 42, Issue 5

Articles
Evangeleen Pattison, Eric Grodsky, and Chandra Muller

Is the Sky Falling? Grade Inflation and the Signaling Power of Grades
Educational Researcher June/July 2013 42: 259-265, first published on May 9, 2013

Critical Pedagogy Enacted in the Gay-Straight Alliance: New Possibilities for a Third Space in Teacher Development
Educational Studies in Mathematics  
*Volume 83, Issue 2*  
June 2013

**Articles**

Making sense by measuring arcs: a teaching experiment in angle measure  
Kevin C. Moore

Examining number sense and algebraic reasoning through cognitive styles  
Marilena Chrysostomou, Demetra Pitta-Pantazi, Chara Tsingi, Eleni Cleanthous, Constantinos Christou

Mapping the structure of knowledge for teaching nominal categorical data analysis  
Randall E. Groth, Jennifer A. Bergner

Learning mathematics—letting the pupils have their say  
Clare Lee, Sue Johnston-Wilder

The interplay among gestures, discourse, and diagrams in students’ geometrical reasoning  
Chia-Ling Chen, Patricio Herbst

Exploring one student’s explanations at different ages: the case of Sharon  
Esther Levenson

Exploring young children’s self-efficacy beliefs related to mathematical and nonmathematical tasks performed in kindergarten: abused and neglected children and their peers  
Dina Tirosh, Pessia Tsamir, Esther Levenson, Michal Tabach, Ruthi Barkai

Study and research courses as an epistemological model for didactics  
Carl Winsløw, Yves Matheron, Alain Mercier
Adult numeracy and the totally pedagogised society: PIAAC and other international surveys in the context of global educational policy on lifelong learning
Anna Tsatsaroni, Jeff Evans

Latino/a bilinguals and their teachers developing a shared communicative space
Erin Elizabeth Turner, Higinio Dominguez, Susan Empson, Luz Angelica Maldonado

Gender differences in both tails of the distribution of numerical competencies in preschool children
Jan Lonnemann, Janosch Linkersdörfer, Marcus Hasselhorn, Sven Lindberg

Everyday pedagogical practices in mathematical play situations in German “Kindergarten”
Birgit Brandt

Modes of modelling assessment—a literature review
Peter Frejd

Discernment of invariants in dynamic geometry environments
Allen Leung, Anna Baccaglini-Frank, Maria Alessandra Mariotti

Graphical artefacts: Taxonomy of students’ response to test items
Oduor Olande

Trends in the development of student level of reasoning in pattern generalization tasks across grade level
Murad Eid Jurdak, Rabih Raif El Mouhayar

Volume 83, Issue 3
July 2013

How secondary level teachers and students impose personal structure on fractional expressions and equations—an expert-novice study
Christian Rüede
The co-construction of learning difficulties in mathematics—teacher–student interactions and their role in the development of a disabled mathematical identity
Einat Heyd-Metzuyanim

The juxtaposition of instructor and student perspectives on mathematics courses for elementary teachers
Lynn C. Hart, Susan Oesterle, Susan L. Swars

Examining calculator use among students with and without disabilities educated with different mathematical curricula
Emily C. Bouck, Gauri S. Joshi, Linley Johnson

Generating and using examples in the proving process
J. Sandefur, J. Mason, G. J. Stylianides, A. Watson

University students’ grasp of inflection points
Pessia Tsamir, Regina Ovodenko

New materialist ontologies in mathematics education: the body in/of mathematics
Elizabeth de Freitas, Nathalie Sinclair

“Bigger number means you plus!”—Teachers learning to use clinical interviews to understand students’ mathematical thinking
Mary Anne Heng, Akhila Sudarshan

Kristin King Hess

Synergies between theoretical approaches to mathematics education with technology: A case study through a cross-analysis methodology
Mirko Maracci, Claire Cazes, Fabrice Vandebrouck, Maria Alessandra Mariotti
Pre-service teachers’ future-oriented mathematical identity work
Sonja Lutovac, Raimo Kaasila

Introducing an observational measure of standards-based mathematics teaching practices: Evidence of validity and score reliability

Critical alignment in inquiry-based practice in developing mathematics teaching
Simon Goodchild, Anne Berit Fuglestad, Barbara Jaworski

Factors mathematicians profess to consider when presenting pedagogical proofs
Yvonne Lai, Keith Weber

Research on mathematics learning at the “Center of Individual Development and Adaptive Education” (IDeA)—an introduction
Götz Krummheuer
Mathematical Thinking and Learning

Volume 15, Issue 3
2013

Articles

Relationships between Gender, Cognitive Ability, Preference, and Calculus Performance
Erhan Selcuk Haciomeroglu, Eric Chicken & Juli K. Dixon pages 175-189

Generating Scenarios of Division as Sharing and Grouping: A Study of Japanese Elementary and University Students
Shigehiro Kinda pages 190-200

Prospective Secondary Mathematics Teachers’ Understanding and Cognitive Difficulties in Making Connections among Representations
Kyunghae Moon, Mary E. Brenner, Bill Jacob & Yukari Okamoto pages 201-227
Journal of Research in Science Teaching

Volume 50, Issue 5

Research Articles

Toward a Lived Science Curriculum in Intersecting Figured Worlds: An Exploration of Individual Meanings in Science Education (pages 501–529)
Jeremy F. Price and Katherine L. McNeill
Article first published online: 28 FEB 2013 | DOI: 10.1002/tea.21084

Establishing Assessment Scales Using a Novel Disciplinary Rationale for Scientific Reasoning (pages 530–560)
Per Morten Kind
Article first published online: 2 APR 2013 | DOI: 10.1002/tea.21086

Learning to Argue and Arguing to Learn: Argument-Driven Inquiry as a Way to Help Undergraduate Chemistry Students Learn How to Construct Arguments and Engage in Argumentation During a Laboratory Course (pages 561–596)
Joi Phelps Walker and Victor Sampson
Article first published online: 25 MAR 2013 | DOI: 10.1002/tea.21082

Validity Evidence for Learning Progression-Based Assessment Items That Fuse Core Disciplinary Ideas and Science Practices (pages 597–626)
Amelia Wenk Gotwals and Nancy Butler Songer
Article first published online: 28 FEB 2013 | DOI: 10.1002/tea.21083
International Journal of Science Education

Volume 35, Issue 9

Original Articles

A Systemic Functional Linguistic Analysis of the Utterances of Three South African Physical Sciences Teachers
Kavish Jawahar & Edith R. Dempster pages 1425-1453

Chinese and US Middle-School Science Teachers' Autonomy, Motivation, and Instructional Practices
Laura Robertson & M. Gail Jones pages 1454-1489

Nanotechnology and Nanoscale Science: Educational challenges
M. Gail Jones, Ron Blonder, Grant E. Gardner, Virginie Albe, Michael Falvo & Joel Chevrier pages 1490-1512

Investigating the Potential of Irish Primary School Textbooks in Supporting Inquiry-based Science Education (IBSE)
Jonathan Dunne, Abdulhussain E. Mahdi & John O'Reilly pages 1513-1532

The Benefits of Cooperative Learning to Socio-scientific Discussion in Secondary School Science
Stephen P. Day & Tom G. K. Bryce pages 1533-1560

Developing Energy Literacy in US Middle-Level Students Using the Geospatial Curriculum Approach
Alec M. Bodzin, Qiong Fu, Tamara E. Peffer & Violet Kulopages 1561-1589

Pedagogical Transformations of Science Content Knowledge in Korean Elementary Classrooms
Phil Seok Oh & Kyoung Suk Kim pages 1590-1624

Volume 35, Issue 10

Promoting and Scaffolding Elementary School Students' Attitudes Toward Science and Argumentation Through a Science and Society Intervention
Zuway-R. Hong, Huann-shyang Lin, Hsin-Hui Wang, Hsiang-Ting Chen & Kuay-Keng Yang pages 1625-1648
Towards a Complete Commonsense Theory of Motion: The interaction of dimensions in children's predictions of natural object motion
Michael Hast & Christine Howe
Pages 1649-1662

Developing a Fine-Grained Learning Progression Framework for Carbon-Transforming Processes
Hui Jin, Li Zhan & Charles W. Anderson
Pages 1663-1697

Prospective Elementary Teachers' Science Teaching Orientations and Experiences that Impacted their Development
Lucy Avraamidou
Pages 1698-1724

Sex Education Representations in Spanish Combined Biology and Geology Textbooks
Belen Garcia-Cabeza & Ana Sanchez-Bello
Pages 1725-1755

Science Professional Learning Communities: Beyond a singular view of teacher professional development
M. Gail Jones, Grant E. Gardner, Laura Robertson & Sarah Robertson
Pages 1756-1774

Volume 35, Issue 11

Development and Validation of a Scale to Assess Students’ Attitude towards Animal Welfare
Beatriz Mazas, Ma Rosario Fernandez Manzanal, Francisco Javier Zarza & Gustavo Adolfo Maripanes
Pages 1775-1799

Elementary Teachers' Classroom Practices and Beliefs in Relation to US Science Education Reform: Reflections from within
Margareta Maria Thomson & Bradley Gregory
Pages 1800-1823

Inequality in Experiences of Physics Education: Secondary School Girls' and Boys' Perceptions of their Physics Education and Intentions to Continue with Physics After the Age of 16
Tamjid Mujtaba & Michael J. Reiss
Pages 1824-1845
Integrating Skills and Wills Instruction in Self-Regulated Science Text Reading for Secondary Students
Tova Michalskypages 1846-1873

Exploring Secondary Students' Knowledge and Misconceptions about Influenza: Development, validation, and implementation of a multiple-choice influenza knowledge scale
William L. Romine, Lloyd H. Barrow & William R. Folkpages 1874-1901

Pre-Service Elementary Teachers' Conceptions about Wind
Achilleas Mandrikas, Constantine Skordoulis & Krystallia Halkiapages 1902-1924

Volume 35, Issue 12

Inquiry-Based Professional Development: What does it take to support teachers in learning about inquiry and nature of science?
Daniel K. Capps & Barbara A. Crawfordpages 1947-1978

Relating Gestures and Speech: An analysis of students' conceptions about geological sedimentary processes
Juan Sebastian Herrera & Eric M. Riggspages 1979-2003
Science Education

Volume: 97, Issue 4
July 2013

Research Articles

The Effect of Argumentative Task Goal on the Quality of Argumentative Discourse (pages 497–523)
MERCE GARCIA-MILA, SANDRA GILABERT, SIBEL ERDURAN and MARK FELTON
Article first published online: 14 JUN 2013 | DOI: 10.1002/sce.21057

A Typology of Actional-Operational Modes in Earth Science and Implications for Science Literacy Instruction (pages 524–549)
AMY ALEXANDRA WILSON
Article first published online: 20 MAY 2013 | DOI: 10.1002/sce.21064

Love It or Leave It: Norwegian Students’ Motivations and Expectations for Postcompulsory Physics (pages 550–573)
MARIA VETLESETER BØE and ELLEN KAROLINE HENRIKSEN
Article first published online: 14 JUN 2013 | DOI: 10.1002/sce.21068

Learning

Analyzing Students’ Learning in Classroom Discussions about Socioscientific Issues (pages 594–620)
KARIN RUDSBERG, JOHAN ÖHMAN and LEIF ÖSTMAN
Article first published online: 14 JUN 2013 | DOI: 10.1002/sce.21065

Science Education Policy

The Relationship Between Time Allocated for Science in Elementary Schools and State Accountability Policies (pages 621–636)
EUGENE JUDSON
Article first published online: 14 JUN 2013 | DOI: 10.1002/sce.21058
The Books
GALE M. SINATRA and DOUG LOMBARDI
Article first published online: 16 MAY 2013 | DOI: 10.1002/sce.21062

SAMI KAHN
Article first published online: 14 JUN 2013 | DOI: 10.1002/sce.21054
International Journal of Mathematical Education in Science and Technology
*Volume 44, Issue 4*
2013

**Original Articles**

Emphasizing language and visualization in teaching linear algebra
John Hannah, Sepideh Stewart & Mike Thomas
pages 475-489

Factors contributing to academic achievement: a Bayesian structure equation modelling study
Amir T. Payandeh Najafabadi, Maryam Omidi Najafabadi & Mohammad Reza Farid-Rohani
pages 490-500

What do mathematics teachers and teacher trainees know about the history of mathematics?
Avikam Gazit
pages 501-512

Enhancing mathematics communication using critical aspects and dimensions of variation
Constanta Olteanu & Lucian Olteanu
pages 513-522

Using calculators for assessing pupils’ conceptualization on place-value
Ioannis Papadopoulos
pages 523-544

The effect of a monitoring scheme on tutorial attendance and assignment submission
Grainne Burke, Ciaran Mac an Bhaird & Ann O'Shea
pages 545-553
Original Articles

Is the derivative a function? If so, how do students talk about it?
Jungeun Parkpages 624-640

Constructing the integral concept on the basis of the idea of accumulation: suggestion for a high school curriculum
Anatoli Kouropatov & Tommy Dreyfuspaces 641-651

Growth in the understanding of infinite numerical series: a glance through the Pirie and Kieren theory
Myriam Codes, María Teresa González Astudillo, María Laura Delgado Martín & María Consuelo Montrerrubio Pérezpages 652-662

Graphs of functions of two variables: results from the design of instruction
Rafael Martínez-Planell & María Trigueros Gaismanpages 663-672

Where does the calculus go? An investigation of how calculus ideas are used in later coursework
Jennifer A. Czocher, Jenna Tague & Greg Bakerpages 673-684

The calculus student: insights from the Mathematical Association of America national study
David M. Bressoud, Marilyn P. Carlson, Vilma Mesa & Chris Rasmussenpages 685-698

Concept of finite limit of a function at a point: meanings and specific terms
José Antonio Fernández-Plaza, Luis Rico & Juan Francisco Ruiz-Hidalgopages 699-710

Without derivatives or limits: from visual and geometrical points of view to algebraic methods for identifying tangent lines
L. Vivier pages 711-717
Articles

Learning trajectories in teacher education: Supporting teachers’ understandings of students’ mathematical thinking
Original Research Article
*Pages 103-121*
P. Holt Wilson, Gemma F. Mojica, Jere Confrey

Understanding the integral: Students’ symbolic forms
Original Research Article
*Pages 122-141*
Steven R. Jones

Developing shift problems to foster geometrical proof and understanding
Original Research Article
*Pages 142-159*
Sonia Palha, Rijkje Dekker, Koeno Gravemeijer, Bernadette van Hout-Wolters

A didactical situation for the enhancement of meta-analogical awareness
Original Research Article
*Pages 160-172*
Modestina Modestou, Athanasios Gagatsis

Equation structure and the meaning of the equal sign: The impact of task selection in eliciting elementary students’ understandings
Original Research Article
*Pages 173-182*
Ana C. Stephens, Eric J. Knuth, Maria L. Blanton, Isil Isler, Angela Murphy Gardiner, Tim Marum
Development of a top-view numeric coding teaching-learning trajectory within an elementary grades 3-D visualization design research project
Original Research Article
Pages 183-196
Jacqueline J. Sack

Algebra word problem solving approaches in a chemistry context: Equation worked examples versus text editing
Original Research Article
Pages 197-208
Bing Hiong Ngu, Alexander Seeshing Yeung

Teachers’ conceptions of tangent line
Original Research Article
Pages 209-229
Rosa Elvira Páez Murillo, Laurent Vivier

According to Davis: Connecting principles and practices
Original Research Article
Pages 230-242
Steven M. Schulman

Generating scenarios of addition and subtraction: A study of Japanese university students
Original Research Article
Pages 243-250
Shigehiro Kinda

A model of students' combinatorial thinking
Original Research Article
Pages 251-265
Elise Lockwood
Research Papers

On the sophistication of naïve empirical reasoning: factors influencing mathematicians’ persuasion ratings of empirical arguments
Keith Weber pages 100-114

Mathematics anxiety and stereotype threat: shared mechanisms, negative consequences and promising interventions
Erin A. Maloney, Marjorie W. Schaeffer & Sian L. Beilock pages 115-128

Efficient and flexible strategy use on multi-digit sums: a choice/no-choice study
Joke Torbeyns & Lieven Verschaffel pages 129-140

Every Child Counts: testing policy effectiveness using a randomised controlled trial, designed, conducted and reported to CONSORT standards
Carole Torgerson, Andy Wiggins, David Torgerson, Hannah Ainsworth & Catherine Hewitt pages 141-153

Are secondary school students still hampered by the natural number bias? A reaction time study on fraction comparison tasks
Jo Van Hoof, Tristan Lijnen, Lieven Verschaffel & Wim Van Dooren pages 154-164
Ending up with less: the role of working memory in solving simple subtraction problems with positive and negative answers
Nicole D. Robert & Jo-Anne LeFevre pages 165-176

HLM in cluster-randomised trials – measuring efficacy across diverse populations of learners
Stephen Hegedus, John Tapper, Sara Dalton & Finbarr Sloan pages 177-188

Current Report
Use of multiple representations in technology rich environments
Hatice Akkoç & Mehmet Fatih Ozmanta pages 189-190

Pre-service primary mathematics teachers' opportunities to learn about school mathematics topics
Yahya Al Zahrani & Keith Jones pages 191-192

Teacher-student dialogue during one-to-one interactions in a post-16 mathematics classroom
Clarissa Grandi pages 193-194

Engaging students with pre-recorded ‘live’ reflections on problem-solving with Livescribe pens
Mike Hickman pages 195-196

Social inequalities, meta-awareness and literacy in mathematics education
Bodil Kleve pages 197-198

Beauty as fit: a metaphor in mathematics?
Manya Raman & Lars-Daniel Öhman pages 199-200
Making sense of fractions in different contexts
Frode Rønning pages 201-202

Developing statistical literacy with Year 9 students: a collaborative research project
Sashi Sharma pages 203-204

Book Review
Space, time and number in the brain: searching for the foundations of mathematical thought
Markku S. Hannula pages 205-208

Single-case and small-n experimental designs: a practical guide to randomization tests
Jim Ridgway pages 208-212
Journal for Research in Mathematics Education

Volume 42, Issue 4

Generalizing-Promoting Actions: How Classroom Collaborations Can Support Students’ Mathematical Generalizations
Amy B. Ellis
Page 308

Anchoring Students’ Metaperspective Discussions of History in Mathematics
Uffe Thomas Jankvist
Page 346
A Switch Between Topological Domains Underlies HoxD Genes Collinearity in Mouse Limbs
Guillaume Andrey, Thomas Montavon, Bénédicte Mascrez, Federico Gonzalez, Daan Noordermeer, Marion Leleu, Didier Trono, François Spitz, and Denis Duboule
Science 7 June 2013: 1234167

Evolution of Mammalian Diving Capacity Traced by Myoglobin Net Surface Charge
Scott Mirceta, Anthony V. Signore, Jennifer M. Burns, Andrew R. Cossins, Kevin L. Campbell, and Michael Berenbrink
Science 14 June 2013: 1234192

Pliocene Warmth, Polar Amplification, and Stepped Pleistocene Cooling Recorded in NE Arctic Russia
Julie Brigham-Grette, Martin Melles, Pavel Minyuk, Andrei Andreev, Pavel Tarasov, Robert DeConto, Sebastian Koenig, Norbert Nowaczyk, Volker Wennrich, Peter Rosén, Eeva Haltia, Tim Cook, Catalina Gebhardt, Carsten Meyer-Jacob, Jeff Snyder, and Ulrike Herzschuh
Science 21 June 2013: 1421-1427. Published online 9 May 2013

Elongation Factor G Bound to the Ribosome in an Intermediate State of Translocation
David S. Tourigny, Israel S. Fernández, Ann C. Kelley, and V. Ramakrishnan
Science 28 June 2013: 1235490

Control of Ribosomal Subunit Rotation by Elongation Factor G
Arto Pulk and Jamie H. D. Cate
Science 28 June 2013: 1235970

Crystal Structures of EF-G–Ribosome Complexes Trapped in Intermediate States of Translocation
Jie Zhou, Laura Lancaster, John Paul Donohue, and Harry F. Noller
Science 28 June 2013: 1236086
The Long-Term Stability of the Human Gut Microbiota
Jeremiah J. Faith, Janaki L. Guruge, Mark Charbonneau, Sathish Subramanian, Henning Seedorf, Andrew L. Goodman, Jose C. Clemente, Rob Knight, Andrew C. Heath, Rudolph L. Leibel, Michael Rosenbaum, and Jeffrey I. Gordon
Science 5 July 2013: 1237439

Bringing Ecosystem Services into Economic Decision-Making: Land Use in the United Kingdom
Science 5 July 2013: 45-50.

Autonomic Nerve Development Contributes to Prostate Cancer Progression
Claire Magnon, Simon J. Hall, Juan Lin, Xiaonan Xue, Leah Gerber, Stephen J. Freedland, and Paul S. Frenette
Science 12 July 2013: 1236361

Tight Coordination of Protein Translation and HSF1 Activation Supports the Anabolic Malignant State
Science 19 July 2013: 1238303

The Diffusion of Microfinance
Abhijit Banerjee, Arun G. Chandrasekhar, Esther Duflo, and Matthew O. Jackson
Science 26 July 2013: 1236498
mTORC1 Phosphorylation Sites Encode Their Sensitivity to Starvation and Rapamycin
Seong A. Kang, Michael E. Pacold, Christopher L. Cervantes, Daniel Lim, Hua Jane Lou, Kathleen Ottina, Nathanael S. Gray, Benjamin E. Turk, Michael B. Yaffe, and David M. Sabatini
Science 26 July 2013: 1236566
