**CHEMICAL SCIENCES LABORATORY (CSL building)**

**VizCenter: Helping the World**

*CSL 120*

See how the VizCenter helps with Humanitarian Assistance Disaster Relief, stimulation of international relationships and trade, plus assisting law enforcement through emerging technologies, innovative back-end processing, and operational needs.

**CSI meets CSU**

*CSL 226*

Learn about Forensic Science, develop fingerprints utilizing different methods.

**X-ray Crystallography**

*CSL 231*

Chemists and biologists learn how a molecule works by studying its three-dimensional structure. Even the largest molecules are too small to be directly observed by the most powerful light microscopes.

**Make a Bouncing Ball with Polymer Chemistry**

*CSL 2nd-Floor*

Make a polymer bouncing ball out of common household items.

**Show-Me Geology**

*CSL 2nd-Floor*

Learn about the importance of rocks and minerals in everyday-life, start a mineral collection.

**Laser Applications in Chemistry and Biochemistry**

*CSL 302*

A wide range of lasers, used in multi-photon nonlinear laser techniques for biomedical and environmental applications, will be on display.

**Engineering & Electromagnets (Aztec Science Camp)**

*CSL 3rd-Floor*

Find your creativity as you complete an engineering design task to withstand “The Crusher” and build an electromagnet. Parents can learn more about Aztec Science Summer Camp.

**Marine Life Touch Tank**

*CSL 4th-Floor*

Learn about Southern California marine life and ecosystems with the Coastal and Marine Institute.

**Who Cheated? Find out by Using Chromatography**

*CSL 526*

Five students are suspected of forging the answers to an exam. You need to determine if one of the pens found on a suspect matches the ink from the exam. Use the same technique the police use to analyze ink.

---

**PHYSICS ASTRONOMY (PA building)**

**The Lab Zone**

*PA 119*

Hands-on design, building, and testing of your very own project to learn basic math, engineering, and scientific principles.

**Super-Cool Ice Cream: The Cool World of Cryogenics**

*PA 215*

Liquid nitrogen instant ice cream, balloon freezing, and much more.

**Planetarium Shows**

*PA 209*

Enjoy a tour of the starry night sky in our planetarium. Shows are 20 minutes long and are given every half-hour. (Unfortunately, there is no wheelchair access inside the planetarium.)

**Telescopic Views of the Sun**

*PA Roof*

View the Sun (safely) though telescopes; hopefully see sunspots.

---

**ENGINEERING (Mediterranean Garden & E building)**

**Engineering Village Mediterranean Garden**

Various displays including: mechanical engineering machine shop, aerospace, and robotics. Facility tours start at 10:30am, 11:30am, and 12:30pm.

**BioEngineer for the Day**

*ENG 221*

Learn how electrical signals are measured from the muscles and brain and used to control devices from games to prosthetic limbs.

---

**LIFE SCIENCES (LSS & LSN buildings)**

**Museum of Biodiversity**

*LSS 269*

See big bugs, hairy spiders, skeletons, furs, feathers, plants, and more from our vast museum collection. Learn about field biology and natural history education at SDSU.

**Phage Attack: Weapons of Microbe Destruction**

*LSN 2nd-Floor*

Learn how phage, the viruses of bacteria, launch attacks against their bacterial targets. See bacterial cultures before and after phage attack.

**Exploration of the Human Body**

*LSN 3*

Explore the amazing world of the human body. Look into a microscope to see the incredible organization and beauty behind bone and muscle.

**Flow Cytometry Facility: Lasers Make Cells Glow**

*LSN 26*

Watch with microscopes as high-powered lasers allow individual cells to fluoresce in different colors.

---

**GEOLOGY, MATHEMATICS, COMPUTER SCIENCE (GMCS building)**

**Take a Land Cruise on the RP Oceans**

*GMCS 108*

Make waves, move beaches, and measure the Earth’s rotation.

**Regenerating the Human Body with Stem Cells**

*GMCS 128*

Learn how stem cells make-up different parts of the human body and how they repair and replace dead and damaged organs.

**Build Your Own Butane: Chemistry on the Computer**

*GMCS 245a*

Use molecular modeling software on computers to construct a molecule and test it for stability.

---
