CHEMICAL SCIENCES LABORATORY (CSL building)

**VizCenter: Helping the World**  
See how the VizCenter helps with Humanitarian Assistance Disaster Relief, stimulation of international relationships and trade, plus assisting law enforcement through emerging technologies, innovative back-end processing, and operational needs.

**CSI meets CSU**  
Learn about Forensic Science, develop fingerprints utilizing different methods.

**X-ray Crystallography**  
Chemists and biologists learn how a molecule works by studying its three-dimensional structure. Even the largest molecules are too small to be directly observed by the most powerful light microscopes.

**Make a Bouncing Ball with Polymer Chemistry**  
Make a polymer bouncing ball out of common household items.

**Show-Me Geology**  
Learn about the importance of rocks and minerals in everyday-life, start a mineral collection.

**Laser Applications in Chemistry and Biochemistry**  
A wide range of lasers, used in multi-photon nonlinear laser techniques for biomedical and environmental applications, will be on display.

**Engineering & Electromagnets (Aztec Science Camp)**  
Find your creativity as you complete an engineering design task to withstand “The Crusher” and build an electromagnet. Parents can learn more about Aztec Science Summer Camp.

MUSEUM OF BIODIVERSITY (LSS & LSN buildings)

**Museum of Biodiversity**  
See big bugs, hairy spiders, skeletons, furs, feathers, plants, and more from our vast museum collection. Learn about field biology and natural history education at SDSU.

**Phage Attack: Weapons of Microbe Destruction**  
Learn how phage, the viruses of bacteria, launch attacks against their bacterial targets. See bacterial cultures before and after phage attack.

**Exploration of the Human Body**  
Explore the amazing world of the human body. Look into a microscope to see the incredible organization and beauty behind bone and muscle.

**Flow Cytometry Facility: Lasers Make Cells Glow**  
Watch with microscopes as high-powered lasers allow individual cells to fluoresce in different colors.

GEOLOGY, MATHEMATICS, COMPUTER SCIENCE (GMCS building)

**Take a Land Cruise on the RP Oceans**  
Make waves, move beaches, and measure the Earth’s rotation.

**Regenerating the Human Body with Stem Cells**  
Learn how stem cells make-up different parts of the human body and how they repair and replace dead and damaged organs.

**Build Your Own Butane: Chemistry on the Computer**  
Use molecular modeling software on computers to construct a molecule and test it for stability.

PHYSICS ASTRONOMY (PA building)

**The Lab Zone**  
Hands-on design, building, and testing of your very own project to learn basic math, engineering, and scientific principles.

**Super-Cool Ice Cream: The Cool World of Cryogenics**  
Liquid nitrogen instant ice cream, balloon freezing, and much more.

**Planetarium Shows**  
Enjoy a tour of the starry night sky in our planetarium. Shows are 20 minutes long and are given every half-hour. (Unfortunately, there is no wheelchair access inside the planetarium.)

**Telescopic Views of the Sun**  
View the Sun (safely) though telescopes; hopefully see sunspots.

**Physical Sciences (PS building)**

**Electron Microscope Facility**  
See inside cells magnified thousands of times on our scanning and transmission electron microscopes.

**ENGINEERING (Mediterra...
